

# Hypnosis and LUCK

Jim Fallon 10/21/04

First, games of chance are in fact just that, a game of chance. Success, to a great extent, can be influenced by luck, but this is not to say that luck is an accident.

1. Luck is predictable, it can be controlled. By concentrating on several "luck factors"- key areas of your life that influence your future success-you can take the reigns of chance and feel yourself racing forward at a greater rate than you have ever imagined, by simply using a few tools and skills.

But what do "lucky" people do that gives them the advantage that makes a difference?

They listen to and use and develop their intuition. **They see and take advantage of opportunities.** We do have the power to put ourselves into lucky positions in life.

Lucky people make effective decisions by listening to their intuition and gut feelings. In addition, they take steps to actively boost their intuitive abilities by, for example, going within and clearing their mind of other thoughts.

They have developed their Faith, belief and expectation and program their minds for Good Fortune.

Lucky people are certain that the future is going to be full of good fortune. These expectations become self-fulfilling prophecies by helping lucky people persist in the face of failure, and shape their interactions with others in a positive way. They always see the glass as half full in every situation. Unlucky people see everything as avoiding pain...lucky people see everything as moving toward pleasure.

The future has not yet been impressed on physics. In fact, since we have not yet lived the future, it can change... if we change our mind.

The past is composed of materialized thoughts. They are easier to detect. The present is the process of materializing thoughts. These are harder. The future is composed of thoughts that have been conceived but have not yet been materialized. That's because the future has not yet been impressed on physics. These are the hardest of all..and trying to foretell the future becomes difficult.

It is difficult to hit a moving target. Even the best psychics only randomly achieve results in excess of 70 percent correct. In fact, since we have not yet lived the future, it can change... if we change our mind.

**With this hypnosis technique you are influencing the future thoughts of winning , and changing the future from something just conceived, to something that has now started the process of materializing. This is not mystical magic..it is your brain retuning its reticular activating system filter. Its just like changing the radio station on your radio from 95.5 to 102.7.**

**Think of this like the hum of your kitchen refrigerator. You never hear it unless someone redirects your attention to it..then this filter lets it in to your perception system. SO now you are going to tune it to the opportunities and lucky advantages that are all around you...but that your not focusing on right now.You become a luck magnet and draw these situations to you.**

Again, in games of chance, you have little or no control over the outcome. Chance is random. Luck is different from chance. A winning lucky person has achieved their results based on their programming to achieve the outcome they desire in the present moment. Their going within and programming will dramatically increase the likelihood of winning. These persons do everything possible to increase their possibility area to achieve their desired result. Again, "chance" is almost completely out of your control, and luck is really the increase of your possibility area, allowing you to become synchronic..and allowing your mind to notice the opportunities that are around you that you may not see now and may be filtering out. That said, we do have the power to put ourselves into lucky positions in life.

So get in flow with chance by enhancing your luck! Getting in flow with chance is the purpose of luck!

**it's a good idea to learn the rules of the game you want to play and keep visualizing yourself and "acting as if" you have already won the amount you desire to win. Remember it's the feeling of winning that counts more than the actual image. You may meet with even greater success if you express and feel gratitude for your winnings in advance or in today's thinking...focus on the end result. This impresses upon your subconscious the idea that the money you desire is already yours and winning becomes more effortless. Feelings of desperation and self-interest will disconnect you from the ability to win. The secret is detachment. While more players are realizing that they should keep on visualizing themselves as winners, they don't realize that it's not their conscious mind that will make them win, but the subconscious. Your chances of winning will depend more on developing the power of your intuition and establishing communication channels with that part of you...that inner part of your mind...the RAS system... that knows what is the best move you should make in order to win.**

**It's important to create and deeply impress upon the subconscious mind a FEELING of winning. See your self as having already won...hear what it sounds like to here the sounds of winning,,,of luck. Bring in the senses..its like giving the different parts of the brain the same sheet music so they all play in sync to reach your goal!!**

**As you begin to feel like a winner, as you program your subconscious mind with the "winning attitude", you'll begin to expect to win and you'll open the way for winnings.**

**This script is very special technology. It uses a special circle of power..your circle of luck, along with the development of a special mental luck meter that**

**assists you in good money management and betting practices.**
